Rockefeller has parabolicantenna (all basic Norwegian channels and some foreign). It is possible to locate TV's in several positions in the house, including backstage. It is also possible to transfer video and audio to the other rooms by the use of an internal TV/video system. There is also a computer connected for sending messages to our guests via the videosystem.

## **Cinemaequipment at Rockefeller:**

35 mm + 16 mm cinema projector

Cinemascreen: Maximum size 11 x 6 meters. With possibilities of masking.
